Data Analysis Project

Data Analyst: Akshat Asthana

Client/Sponsor:

Purpose:

Analysis of top 2000 Anime on how the anime rating depends upon Genre and other factors.

Scope / Major Project Activities:

Activity	Description
Gathering Data	CSV file downloaded from Kaggle of top 2000 anime from myanimelist.com
Data cleaning and Organizing Data	Removing duplicates and Null Values
Deriving correlations	Plotting charts, graphs.
Deriving conclusion and Finalizing report	Determining dependency on various elements.
Getting Feedback and DOing surveys(If ambiguity presents itself.)	Doing QnA with Peoples, getting feedback and answering most common Questions.

Deliverables:

Deliverable	Description/ Details
Dependency of Rating on Animation Company	I think this will be interesting as there is a belief that a certain company produces higher rated anime than others.

Schedule Overview / Major Milestones:

This is a small project and can be done in 2 days.

*Estimated date for completion:

15May 2022
